Thanks John for tracking the article down!

This was an Air Toxics (40 CFR 63 NESHAP) request and action (i.e., taken care of w/in SSU – my shop). Region 10 responded to Conoco's request with a request for more information. See attached. Conoco just provided a response to this (also attached). We are not prioritizing this request since HQ provided them (and all other N. Slope oi/gas facilities) an exemption for leak detection testing due to the cold weather. If this doesn't get appealed then we will ask Conoco to withdraw their request (since it's not no longer needed).

There was this article: <https://insideclimatenews.org/news/31052018/arctic-oil-gas-methane-leak-detection-technology-reliability-problems-alaska-climate-change>

But it doesn't reference a letter TO COPC (only from COPC).
